SUBJECT: Notice of Pesticide Applications

CCR Section 6618 requires certain notifications to be provided to the “operator” of the property where pesticides are being applied, as well as to persons whom the operator has reason to believe may enter the property during and after the application period. Anyone applying pesticides is required to notify the operator of the property (i.e. the HOA) the following three items PRIOR to conducting any pesticide application:

1. The date(s) of the scheduled application of pesticides to the property
2. The identity of the pesticide by brand or common chemical name
3. The precautions printed on the pesticide label or included in laws and regulations to protect persons during the application.

6618. Notice of Applications.

(b) This subsection applies to the use of any pesticide for purposes other than the commercial or research production of an agricultural plant commodity. Notifications required by this subsection must be given orally or in writing and be completed prior to the use of any pesticide and in ample time for all subsequent notifications to be made and for all persons notified to take appropriate action. This time will differ depending on the circumstances of each notification.

(1) Each person performing pest control shall assure that the operator of the property receives notice of the scheduled application. The notice must be in a manner the person can understand and include:

(A) The date of the scheduled application;

(B) The identity of the pesticide (including spray adjuvants, if applicable) by brand or common chemical name; and

(C) Any other precautions printed on the pesticide product labeling or included in applicable laws or regulations related to the protection of employees or other persons during the application.

(2) The operator of the property shall assure that notice is given to all persons who are on the property to be treated, or who may enter during the application or the period of time that any restrictions on entry are in effect, except for the persons who made or supervised the application for which the notice is intended. The notice must be in a manner the person can understand and include:

(A) The date of the scheduled application;

(B) The identity of the pesticide (including spray adjuvants, if applicable) by brand or common chemical name; and

(C) Precautions to be observed as printed on the pesticide product labeling or included in applicable laws or regulations related to the entry of the treated area.

(3) Compliance by licensed Structural Pest Control Operators with the notice requirements of section 8538 of the Business and Professions Code meets the requirements of this subsection.

(4) Compliance by public agencies with the notice or barrier requirements of section 12978 of the Food and Agricultural Code meets the notice requirements of this subsection.

NOTE: Authority cited: Sections 12976 and 12981, Food and Agricultural Code.
